AISS

Artificial Intelligence for Studies and Support in Higher Education

Erasmus+ KA220 - Cooperation Partnerships in Higher Education

01.10.2023 – 30.09.2025

Erasmus+2023-1-ES01-KA220-HED-000153371

WHICH IS THE AIM OF THE PROJECT?

The AISS project aims to increase the availability of digital content, technologies and practices in Higher Education by developing a compendium of best practices and support technology based on Artificial Intelligence (AI) solutions.

WHAT DOES THE PROJECT BRING TO THE FIELD OF HIGHER EDUCATION?

1. Improves teachers' skills in the use of AI in higher education.
2. Increases the use of AI technologies in education through the development of training modules and virtual assistants.
3. Creates a framework and toolkit of AI technologies for wider and faster AI integration in higher education.
4. Improves learners' experience with multimedia technologies by integrating AI-based support systems (chatbots).
5. Enhance multimedia study programmes with innovative AI-based solutions for education and pilot testing with target groups.

Project duration:
24 months
(01.10.2023 – 30.09.2025)

RESULTS

- Compendium of Artificial Intelligence solutions for use in Higher Education.
- Development of 4 chatbots scenarios with virtual assistants: (1) Guidance and assistance in courses (2) Content material support (3) Assessment (4) Support for individual tasks and guidelines.
- Toolbox for teachers and trainers.
- Multimedia study programme: 4 modules on images and video digital content creation.
